HASOM Classroom Quick Start

1. Turn on the Yamaha receiver, Sharp Bluray player, Toshiba VHS player and, if necessary, the projector (using the projector remote).

2. If required, plug your laptop into the VGA, Audio and cat-5 Ethernet cables provided at the top left of the podium, or use the built in MacMini by turning it on (the power button is located at the right rear of the MacMini). USB connectivity for the MacMini is located at the top right of the podium.

3. On the Yamaha receiver, select your desired source by pressing one of the 4 source buttons (MacMini, Laptop, BluRay, VHS). There will be a slight delay from the time a source is selected and when it is displayed, this is normal.

   Audio and video will be switched to your source. The Sharp Bluray player is recommended for all optical media playback (BluRay, DVD, CD).

4. Adjust volume using the volume knob at the front of the Yamaha receiver.
